

FOR IMMEDIATE RELEASE

ScatterMaster™ LLC Announces Lambda Research Corporation as its new Worldwide Distributor

**Littleton, MA and Tucson, Arizona –
September 1, 2010 –**

ScatterMaster LLC today announced Lambda Research Corporation as its new worldwide distributor for its revolutionary new ScatterScope3D™ scatterometer.

ScatterMaster's president and principal designer, Dr. John Stover, is well known in the metrology and scatter measurement community as the author of the text "Optical Scattering Measurement and Analysis", the authoritative book on surface scatter measurement. Dr. Stover has taken his years of experience taking scatter measurements and incorporated this experience into the ScatterScope3D design to make it portable (shoebox), fast (typical measurements in less than 1 minute) and easy to use. Dr. Stover stated "Lambda Research Corporation and ScatterMaster are a perfect fit. Lambda sells the award-winning TracePro® program used throughout the world for stray light, scatter, and illumination analysis, and ScatterMaster provides the necessary surface measurement information needed for TracePro simulations."

The ScatterScope3D is the ideal tool for both research labs and manufacturing lines to measure surface scatter for process control and surface texture verification.

About ScatterMaster LLC.

Scattermaster LLC is based in Tucson Arizona and designs, manufactures and sells both scatterometers and takes surface measurements for the disk storage, computer chip, lighting and display markets. The ScatterMaster sells and markets its products and services in California through Ventura Precision. For more information, visit www.scattermaster.com.

About Lambda Research Corporation

Lambda Research Corporation is a worldwide developer and supplier of optical engineering software and services for the Life Sciences, Industrial Manufacturing, Lighting, Display, Aerospace, and Information Technology markets. Its technical staff has expertise in optical engineering, software development and hands-on applications engineering. Its products include TracePro®, the market leading illumination design software, and OSLO lens design software. Additional information about Lambda Research Corporation can be found at www.lambdares.com.
