

## OSLO7 Revision History

### Release 7.0.1

- Update: Fix intermittent crash/exception that would occur when deleting private glasses
- Update: Print the name of the file being compiled by the message string compiler (cst.exe) when the verbose compiler option (vbse) is turned on
- Update: Improve detection of the loss of the active license when OSLO is running
- Update: Fix bug in Check for Updates that would allow the download of a release that was not supported by the license in use. All users running 7.0.0 should update to this release so OSLO can update properly in the future. – 7194
- Update: Improve the detection of inconsistent amo files and agreement with current ccl

### Release 7.0.0

- New: Added “Check For Updates” capability to automatically check for and download newer releases
- New: Improved licensing using CodeMeter
- Update: Updated glass catalogs
- Update: Asymmetric Aspheres include base conic (OSLO Premium only)
- Update: Improved STEP File Exporter
- Update: Improved ZEMAX importer
- Update: Improved Code V importer
